## **ABSTRACT**

**Title: THE IMPLEMENTATION OF ASSESSMENT IN LISTENING  
SKILL AT SMKN 1 KEDIRI**

Listening comprehension is a fundamental aspect of language learning, yet many students face challenges in developing proficiency in this skill. The background of this research is based on the researcher's observations and experiences. This study aims to answer the questions:

- 1) How is the implementation of assessment in listening skills at SMKN 1 Kediri?
- 2) What problems faced by teacher when they apply assessment at SMKN 1 Kediri?
- 3) What are strategies that used by teacher to solve the problem while doing assessment in listening at SMKN 1 Kediri?

The researcher used observation, interviews, and documentation as research instruments. The researcher conducted interviews with teachers and collected answer sheets from eleventh-grade students. In this study, students were provided with listening audio and asked to rewrite their answers accordingly. Triangulation was employed in data collection procedures, ensuring that participants were presented with hypotheses and given opportunities for practice during classroom evaluations. The results revealed an improvement in students' listening scores, indicating the effectiveness of the implemented assessment strategies. Furthermore, qualitative analysis of students' feedback and interviews provided valuable insights into the students' perceptions of the assessment methods and their impact on their listening skill development.

*Keyword: Assessment, Listening skill, Listening Assessment at School.*

## ACKNOWLEDGEMENTS

Praise be to Almighty God because for the abundance of His grace, knowledge, and wisdom the preparation of this thesis can be completed on time. This thesis is prepared as one of the requirements to obtain a Bachelor of Education (S.Pd) in the English Language Education Program, Faculty of Teacher Training and Education, Universitas Nusantara PGRI Kediri.

During the process of preparing this thesis, the author felt that he received a lot of guidance, direction, and encouragement both directly and indirectly from various parties. In connection with this, on this occasion the author would like to express his deepest gratitude to:

1. Dr. Zainal Afandi, M.Pd, as the Rector of Universitas Nusantara PGRI Kediri who always motivates students
2. Dr. Mumun Nurmilawati, M.Pd, as Dean of the Faculty of Teacher Training and Education, Universitas Nusantara PGRI Kediri
3. Khoiriyah, M.Pd as Head of the English Language Education Study Program, Faculty of Teacher Training and Education, Universitas Nusantara PGRI Kediri
4. Dr. Dewi Kencanawati, M.Pd., as Supervisor I and Mrs. Rika Riwayatningsih, M.Pd., as Supervisor II who have given a lot of guidance and direction from the beginning to the end of the preparation of this thesis
5. All lecturers, employees, and the entire academic community of Universitas Nusantara PGRI Kediri, who have provided a pleasant lecture atmosphere from the first semester to the final semester.
6. The author parents and beloved family who always provide support both in material and non-material forms
7. Friends of the class of 2019 in the English Language Education Study Program, Faculty of Teacher Training and Education, University Nusantara PGRI Kediri, who have provided input and encouragement in completing this thesis.

8. As well as all parties that cannot be written one by one, which has helped a lot so that the writing of this thesis is resolved.

The author realizes that in the preparation of this thesis is still far from perfection. Therefore, the author expects constructive criticism and suggestions for the perfection of further research.

Finally, along with prayers and hopes, hopefully this thesis can be useful for writers, readers, society, the world of education, and science

## **CHAPTER I**

### **INTRODUCTION**

This chapter presents the research foundation including background of the research, the identification of the problem, the purpose of the research, key of term, and organization of the paper.

#### **A. Background of the Research**

The research focuses on the importance of English language education and the need for effective assessment methods to improve students' listening skills. English is considered a crucial foreign language in educational contexts as it is used in various language lessons. The design and use of the English language play a significant role in international communication and language studies.

However, there seems to be a misconception in current educational practices regarding the terms "testing" and "assessing". Many individuals mistakenly believe that testing and assessing are the same, when in fact they are different. A test is a tool used to assess a person's skill, knowledge, or performance in a specific area, while assessment is a continuous process that covers a wide range of topics. Assessment includes any feedback or response from a student in relation to inquiries or comments on their learning. Teachers often assess students' performance, consciously or unconsciously, without relying solely on formal tests.

Assessment is not limited to end-of-course papers or pencil tests that determine how much material students do not know or have yet to master. It encompasses a broad range of activities and tasks that teachers employ on a daily basis to evaluate

student progress and growth. Assessment serves to identify learners' needs, document their progress, and evaluate the effectiveness of teaching and planning methods. Two common types of assessment are frequently utilized: formative assessment and summative assessment. Formative assessment is centered on utilizing feedback and information to enhance the learning process (Bridget D. Arend, 2006:5). Conversely, summative assessment is a formal evaluation conducted at the conclusion of lessons, projects, or courses to gauge overall learning achievement (Jeanne P. Sewell, 2010:302).

To ensure effective assessment, tests should be authentic and reflective of a student's learning, achievement, motivation, and attitude towards relevant classroom activities. Authentic assessment tasks resemble real-world reading and writing scenarios, allowing students to demonstrate various literacy abilities in contexts similar to those in which they would be used. Two important components of authentic writing assessment are the nature of the task and the scoring criteria. Guidelines for constructing writing tasks and examples of different scoring criteria are provided. Additionally, authentic assessments can include both tests and non-test formats, such as portfolios, which provide qualitative assessments of knowledge, attitude, and skills.

Additionally, listening challenges in the classroom can arise from factors such as rapid speech, limited vocabulary, different accents, and established linguistic habits. Every language is influenced by the unique culture of the region in which it is spoken. Therefore, learning a language also involves gaining insights into the culture of its speakers. Language and culture are interconnected since different

places around the world possess distinct cultures. Listening, among other essential skills, is the most communicative activity in daily life (Morey, 1991, Para. 1). Learners are expected to listen twice as much as they speak, four times more than they read, and five times more than they write. Listening holds significant importance in developing language proficiency. It is not only vital for language learning but also for everyday interactions in English with friends. For instance, when we ask for directions to a friend's house, we rely on listening skills to gather all the necessary details (Brown, 2006: 6). Listening is particularly crucial for English students in academic contexts as they need to acquire and develop effective listening skills to comprehend.

In this study, the researcher is interested in researching the results of the student's assessments and listening skills at SMAN 1 Kediri, and the researcher observed how teachers implemented assessment methods for measuring students' listening skills in the classroom. They focused on examining the strategies and techniques employed by teachers to assess listening abilities, as well as the various applications of these assessments during classroom activities. Through their observations, the researcher aimed to gain insights into the effectiveness of the assessment approaches used by teachers and how these assessments contributed to enhancing students' listening skills. Considering the above, the researcher wants to conduct research entitled **THE IMPLEMENTATION OF ASSESSMENT IN LISTENING SKILL AT SMKN 1 KEDIRI**

## **B. Scope of the Research**

This research deals with the application of assessment to develop students' listening skill. Thus, the researcher describes what the aims of assessment on the listening class are. Hindering the misunderstanding, the researcher gives limitation for this research, as follows:

1. The researcher limits the problem on the application of assessment in listening skill in the tenth grade students of SMAN 4 Kediri.
2. The implementation of assessment to develop listening skill at SMKN 1 Kediri are limited in techniques to assess listening skills at the class in learning English at SMAN 4 Kediri.

## **C. Research Problems**

In this research, the researcher formulates the problems as follows:

1. How is the implementation of assessment in listening skills at SMKN 1 Kediri?
2. What problems faced by teacher when they apply assessment at SMKN 1 Kediri?
3. What are strategies that used by teacher to solve the problem while doing assessment in listening at SMKN 1 Kediri?

## **D. The Purpose of the Research**

The purpose of this research is:

1. Describe the implementation of assessment in listening skills at SMKN 1 Kediri.

2. To find out the problems faced by the teacher and the students when they do assessment in listening skill at SMKN 1 Kediri.
3. To describe the strategies used by the teacher to solve the problems while doing assessment in Listening skill at SMKN 1 Kediri.

The result of this research is expected to give a contribution to the teacher, students, and other researcher.

### **E. Significance of the Research**

The significance of the studies are:

1. The Lecturer

The researcher expects in this study helps the implementation of assessment for listening skill.

2. The Researcher

By using this method, perhaps the researcher gets solution to evaluate. The researcher will know what the advantages are by using the assessment method in teaching the English language.

3. The student

This research is a presence to increase students' interest in learning the English language, also can be used to broaden and develop the listening skill.

### **F. Key Terms**

1. **Assessment** refers to the process of gathering information about a learner's language ability or achievement. It encompasses various methods used to evaluate student progress and can be distinguished into two main functions: formative assessment and summative assessment. Formative assessment is

conducted during the learning process to provide feedback and support students' ongoing development of language competencies and skills. The primary goal of formative assessment is to promote student learning and development by identifying areas where students may need additional support or clarification. On the other hand, summative assessment occurs at the end of a learning period and aims to summarize a student's overall achievement and proficiency in a particular area. The primary goal of summative assessment is to determine the extent to which students have achieved the desired learning outcomes.

2. **Listening skill** is a crucial component of effective communication as it enables us to understand others' intentions and messages. When we listen attentively, we can grasp the meaning and nuances of what is being conveyed. It involves actively participating in the process, as highlighted by Rost (1991:1). Successful communication relies on both the speaker and listener, with the listener's understanding dependent on their ability to accurately perceive and comprehend the speaker's words.
3. **Listening Assessment at School** involves students listening to a passage or audio recording instead of reading it. Following the listening task, students are usually required to answer multiple-choice questions that assess various levels of comprehension, including literal understanding and inferential comprehension.
