Dear Prof. Dr. Subagyo Subagyo,

As the Editor for Int. J. of Technology, Policy and Management, I kindly invite you to review this submission and assess its quality and suitability for publication:

"AGRICULTURAL WASTE MANAGEMENT: A POLICY PERSPECTIVE FROM INDIA"

The deadline for completion of the review is 07-Nov-2023.

You can view the article abstract here to check it is within your subject area:

Agricultural waste falls in different categories and each category of waste require their unique management technique Some of these techniques can be implemented at the local level, while some have larger policy implication Over a period of time, Governments have been updating their policies and regulations to manage agro_waste However, there may be many challenges for implementation of these policies Present work presents a comprehensive review of the present state of agriculture waste management, including the different sources and categories of agriculture waste Need of the policies and regulations has been discussed w r t the challenges associated with agro_waste management The regulation and policies for agriculture waste management have been presented from Indian perspective The work is very much helpful not only for the careful implementation of the policies, but also to delineate the need for new policies.

I would be grateful if you could let me know now if you are able to assist with this peer review.

COMMENTS

Confidential comments only for the editor:-

This article is ready to be published, but needs some revisions.

Suggestions which would improve the quality of the article but are not essential for publication:-

I don't think Table 1 regarding the definition of waste is really necessary, because it only increases the number of words. Just take some opinions that fit the research context.

Changes which must be made before publication:-

State clearly the following in the article:

1. The purpose of research and what is the importance of research?

2. Research gap

3. Research design and research stages

4. Results of analysis and discussion
