Deskripsi :

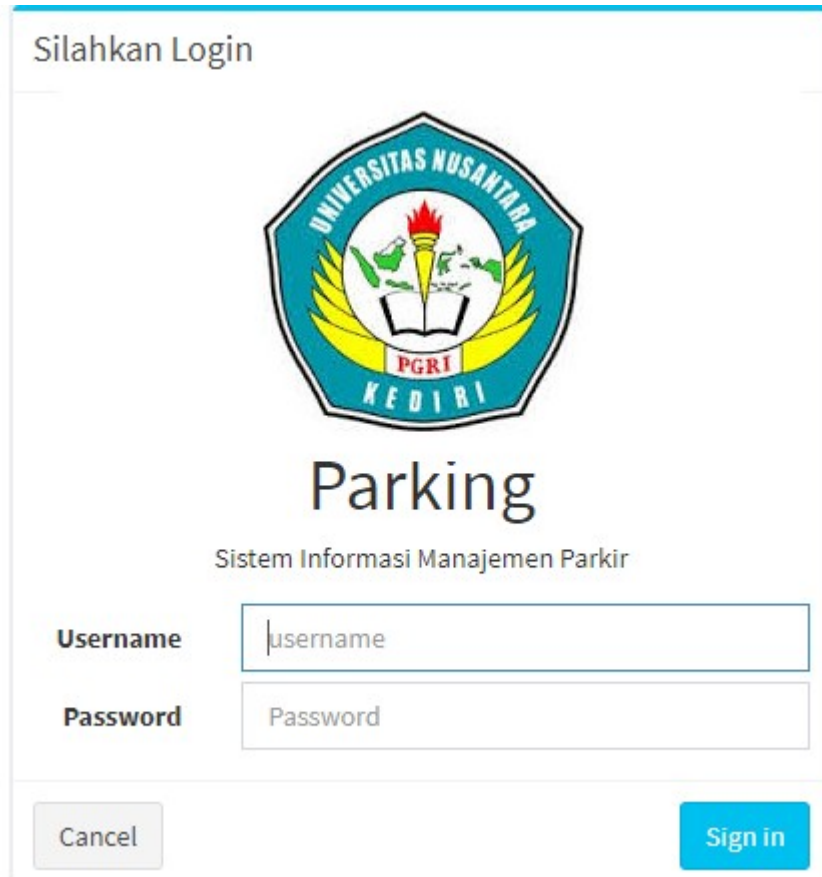

Aplikasi Parkir merupakan suatu aplikasi untuk suatu instansi untuk mengatur parkir kendaraan para tamu yang datang. Aplikasi ini juga dapat memberikan informasi terkait dengan parkir. Aplikasi ini ada 2 (dua) level pengguna, yaitu administrator dan operator. Administrator mempunyai hak akses mengatur data operator, data kendaraan. Operator mempunyai hak akses mengatur parkir masuk dan keluar. Aplikasi ini menggunakan kamera untuk mengambil gambar dari kendaraan dan pemiliknya. Proses atau alur penggunaannya adalah Petugas parkir memasukkan nopol (no.polisi) dari kendaraan yang akan parkir dan mengambil gambar dari kendaraan dan pemiliknya kemudian pelanggan parkir menerima struk bukti parkir. Sebelum pelanggan parkir pulang, harus menyerahkan struk bukti parkir kepada petugas parkir, kemudian petugas parkir memasukkan nopol dari kendaraan, kemudian akan tampil data kendaraan yang diparkir beserta gambar/photonya. Petugas parkir mencocokkan dengan identitas kendaraan dan photo. Jika struk bukti parkir hilang, pelanggan parkir wajib menunjukkan surat kendaraan (STNK) sebagai bukti kepemilikan kendaraan.
